**AMENDMENTS TO THE ABSTRACT**

After the claims, please insert a page containing the Abstract Of The Disclosure, which is attached hereto as a separately typed page.

**ATTENUATION OR TERMINATION ELEMENT HAVING A COAXIAL  
STRUCTURE FOR RADIOFREQUENCY ELECTROMAGNETIC WAVES****ABSTRACT OF THE DISCLOSURE**

The invention relates to an attenuation or termination element comprising at least one resistance part which is mounted in an outer conductor and has at least one connection to an inner conductor part. The resistance part is produced from at least two separately produced plate-shaped parts which are desirably provided with a central slit enabling them to be fitted together. The attenuation or termination element can be economically produced and has high heat dissipation.
